# Q3

Milk Quality Management  
...at Your Fingertips

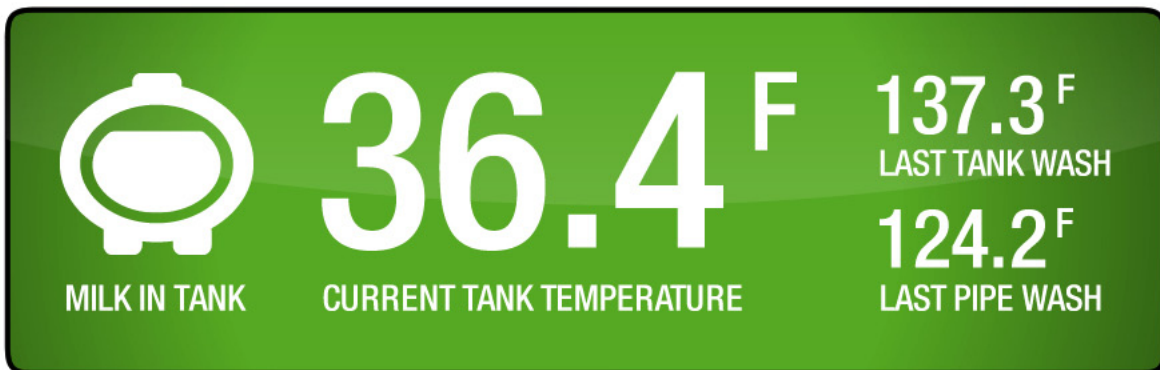

Innovative Solutions for Dairy

Building on the success of the MilkGuard and MilkGuard FD Time Temperature Recorders, the Q3 is the next generation milk quality process management system.

Data & Reports

## The Dairy Cheq Q3

- Successful track record with over 10,000 units of earlier version installed.
- Intuitive, full color touch screen provides display and ease of use.
- Wireless connectivity sends information and customized alerts directly to your mobile phone (optional).
- Add management notes to a warning or alarm for future reference.
- PMO printing capabilities.
- Onscreen graphics provide for real time data analysis.

STAFF CQM

Message for Joe: cow 1245 is treated and in hospital pen.

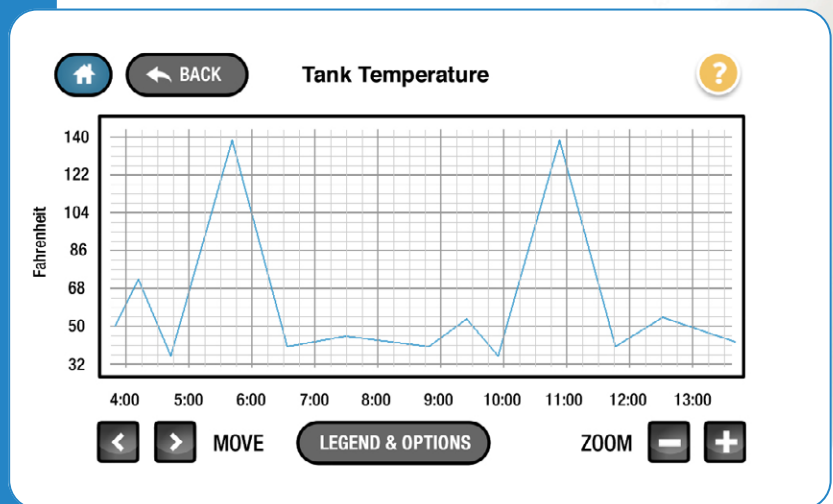

Comprehensive monitoring and reporting of all processes relating to:

- Milk cooling
- Agitation
- Storage temperatures
- Bulk tank and pipeline wash
- Milk vacuum
- Water pressure (optional)

Alerting – when monitored functions exceed set parameters:

- Visual alarm (light in milking parlor)
- Audible alarm
- Communicated alarm - notification sent to mobile phone and/or PC (optional)
- Display screen will provide information and current situation

Has your milk been  
**Dairy Cheq'd?**

## Why you need a Q3

- Early detection of equipment malfunctions.
- Improved quality of milk shipped.
- Electronic records on every load shipped.
- Peace of mind knowing your pipeline cleaning and milk cooling processes are monitored 24 hours per day, 365 days of the year.
